

**Inclined Belt Conveyors**

Podmores have made Belt Conveyors for over thirty years, supplying machinery into almost every industry. From nuts, bolts, hinges, fasteners and fixings to Snack foods, cereals, Chemical and Pharmaceutical products. Single or multiple inlets, - Belts are available in many different sizes and specifications depending on your needs.

This Plastic modular "Swan-neck" conveyor/elevator is the latest addition to our range. Manufactured from Plastic side-walls, with plastic belt and stainless steel fittings it is ideal for the food industry wet or dry.

Stainless steel open mesh belt elevator, ideal for bakery or confectionery applications. Drive motors can be direct or shaft mounted, length, width and height can be tailored to suit your needs.

Corrugated, side walled belt elevator is lifting container caps into a high - level bowl feeder fitted with a "sound enclosure".

This Corrugated, side walled, flighted - belt elevator unit is taking jelly sweets from a store-belt conveyor and Vibratory cross - feeder. The unit discharges into a high level cross - head feeder and ultimately a multi head weigher.

**Hopper Loading Conveyors**

This flighted - belt hopper loader was designed to feed plastic tablet bottles. The bottles are stored in the 300L bulk storage hopper. The system is used to provide a bulk and controlled feed to a bowl feeder.

Inclined flighted belt elevator lifts plastic components into a bowl feeder. The unit is fitted with an anti-cascade inspection cover.

## PolyCord Conveyors

### Loading and Unloading

Podmores have been responsible for the primary feeding of many different products in many different environments. Equally at home in a Quarry or Food factory.

Our range of PolyCord conveyors can be used to convey a wide variety of product, from ceramics to food. Units are available in a range of sizes. Catch trays can be fitted to collect product or debris that falls through the belts. Ideal for glazing or dusting operations.

This set of belt conveyors is used as the primary feed to a tyre recycling process. Increases in the running speed of the various conveyors separates the tyres and helps load the shredding system.

## Spiral Conveyors

This plastic slat belt elevator / lowerator. Constructed from 304-grade stainless steel, with height and belt width options to suit your needs. Ideal for elevating within confined production / packaging spaces.

## Storage Conveyors

When a Bulk supply of product is required in a specific production run, a Store Conveyor can be used to supply both the required volume of storage and the required controlled feed in one item of equipment.
